query	BI / read / 7			
title	Related topics			
pattern				
description	Find all Messages that have a given \$tag. Find the related Tags attached to (direct) reply Comments of these Messages, but only of those reply Comments that do not have the given \$tag. Group the related Tags by name, and get the count of replies in each group.			
params	1	\$tag	Long String	Tags with a similar amount of Messages are selected. To avoid caching, different Tags should be used than the ones in Q5 and Q6.
result	1	relatedTag.name	Long String	R
	2	count	32-bit Integer	A
sort	1	count	↓	
	2	relatedTag.name	↑	
limit	100			
CPs	1.4, 3.3, 5.2, 8.1
